

The power to innovate

Drag Chains in Oil & Gas Exploration

What we build . . .

We specialize in Carrier Chain, also called Drag Chain, for hose and cable management. Our products are bespoke designed to specification, or based on a wide range of product options, but always customised to individual requirements. We deliver any size, from millimetre to metre. We use all industry relevant steel and plastic materials, and follow all industry relevant specifications. We manufacture and deliver fully assembled packages ready for installation or modules for convenient handling and installation on site. All of this to include guide troughs and panels, cable and hose packages. There are specific solutions e.g. for cranes, lifts and hoists.

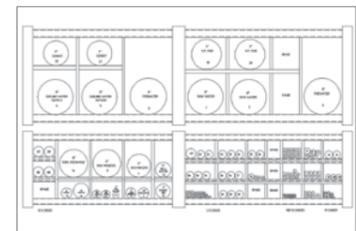

Who we are . . .

KABELSCHLEPP Metool is one of the worlds leading manufacturers of carrier chain (drag chain) for cable and hose management. Part of the **Kabelschlepp worldwide group of companies**, actually the inventor of the cable carrier and today renowned for innovation. Local presence is key, which we can offer with 15 subsidiaries and over 80 representations worldwide. **Present in the oil and gas market since the early 1970's**, we have supplied hundreds of systems for all continents and applications.

Our focus is on quality and superior service life.

We offer full engineering support in the UK and all relevant market places. Customers benefit from our extensive industry, products and engineering know how.

KABELSCHLEPP Metool is certified to ISO 9001 by Moodys international.

ESD cable carriers

What we do . . .

Full project management including:

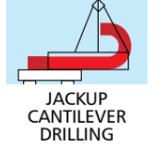

- Consultancy and Site Survey
- Engineering and Design.
- Manufacture and Assembly
- Installation and Supervision.

Why us?

- Market leader in drag chain technology
- Over 4 decades of offshore experience
- Hundreds of systems all over the world
- Specialised engineering resource
- Global support

Applications . . .

- Cranes
- Platform E/W and N/S rig module skidding
- Jackups
- Deck – Cantilever skidding
- Cantilever - Drillfloor travel
- Substructure - Drillfloor skid
- Cantilever X - Yskidding
- Riser Pipe Handling
- BOP Handling
- Xmas tree transport
- Top drive
- Personnel and Service Bridges
- DP thruster raise/lower
- Land rig skidding
- Data, Sensor, Power and other Cable
- Fire Hose
- Low pressure Service Hoses
- High Pressure Mud & Cement Hoses

. . . and basically everything else!
