

TKHD series

Heavy duty cable carriers
for long travel lengths and
high additional loads

Trademarks are legally protected for the TSUBAKI KABELSCHLEPP GmbH as a national or international registration in the following countries: tsubaki-kabelschlepp.com/trademarks

Subject to change

Inner heights

Inner widths

- 1 Aluminum stays available in **1 mm width sections**
- 2 Plastic chain link plates
- 3 Quick and easy opening to the inside or outside for cable laying
- 4 Cable-friendly interior – no interfering edges
- 5 Fixable dividers
- 6 Dividers and subdivision for separating the cables
- 7 Replaceable glide shoes for increased service life in gliding application
- 8 Robust, multiple stop system
- 9 Steel installation brackets
- 10 RSC-system with external role
- 11 With integrated roll for standard guide channels

tsubaki-kabelschlepp.com/tkhd

Features

- Massive, enclosed, stain-repellent stop system
- Massive sidebands through robust double fork-bracket-construction
- Sidebands easy to assemble
- Reinforced pin bore connection
- Integrated noise damping
- Quick and easy opening to the inside or outside for cable laying
- Soil-resistant outer contour
- Easy change of components
- Maintenance-free
- Symmetrical force curve in the sideband
- Quiet and low-wear operating through polygon-optimized contour and radii
- Reduce drive power through less friction

Variable vertical and horizontal inner distribution optional with fixable dividers

Suitable also for roller-mounted application (RSC)

Replaceable glide shoes for longer service life in gliding applications

Roller chain for travel distances up to 800 m

TOTALTRAX® complete systems

Benefit from the advantages of the TOTALTRAX® complete system. A complete delivery from one source – with a warranty certificate on request! Learn more at tsubaki-kabelschlepp.com

TRAXLINE® cables for cable carriers

Hi-flex electric cables which were specially developed, optimised and tested for use in cable carriers can be found at traxline.de.

Unsupported arrangement

KR [mm]	H [mm]	H ₂ [mm]	L _B [mm]	U _B [mm]
250	675.5	860	965	510
310	795.5	980	1154	570
360	895.5	1080	1311	620
500	1175.5	1360	1751	680

Inner heights

Inner widths

Load diagram for unsupported length depending on the additional load.

Sagging of the cable carrier is technically permitted for extended travel lengths, depending on the specific application.

Intrinsic cable carrier weight $q_k = 10 \text{ kg/m}$. For other inner widths, the maximum additional load changes.

Speed
up to 5 m/s

Acceleration
up to 2.5 m/s²

Travel length
up to 13.5 m

Additional load
up to 100 kg/m

tsubaki-kabelschlepp.com/tkhd

Gliding arrangement | GO module with chain links optimized for gliding

KR [mm]	H [mm]	n _{RKR}	L _B [mm]	U _B [mm]	Q _z max [kg/m]
250	351	6	2420	1090	100
310	351	6	2780	1208	100
360	351	6	3230	1380	90
500	351	6	4400	1820	75

Speed
up to 20 m/s

Acceleration
up to 8 m/s²

Travel length
up to 200 m

Additional load
up to 100 kg/m

The gliding cable carrier must be guided in a channel. See p. 782.

The GO module mounted on the driver is a defined sequence of 6 adapted KR/RKR link plates.

Glide shoes must be used for gliding applications.

Our technical support can provide help for gliding arrangements:
technik@kabelschlepp.de

Aluminum stay RMF – frame stay solid

- Aluminum profile bars for heavy loads and large cable carrier widths. Easy threaded connection.
- Available customized in **1 mm grid**.
- **Inside/outside:** Threaded joint easy to release.

Key for abbreviations
on page 64

Stay arrangement on each chain link (**VS: fully-stayed**)

1 mm B_i 100 – 800 mm
in 1 mm width sections

Design guidelines
from page 16

The maximum cable diameter strongly depends on the bending radius and the desired cable type. Please contact us.

Calculating the cable carrier length

Cable carrier length L_k

$$L_k \approx \frac{L_S}{2} + L_B$$

Cable carrier length L_k
rounded to pitch t

Divider systems

As a standard, the divider system is mounted on every 2nd chain link on the center bracket.

As a standard, dividers and the complete divider system (dividers with height separations) can be moved in the cross section (**version A**).

For applications with lateral acceleration and free hanging on the side, the dividers can be attached by simple insertion of a fixing profile into the RMF stay, available as an accessory (**version B**).

Inner heights

Inner widths

Increments

Divider system TSO without height separation

Vers.	a _T min [mm]	a _x min [mm]	a _c min [mm]	a _x Raster [mm]	Π _T min
A	10	20	15	—	—
B	12.5	20	15	5	—

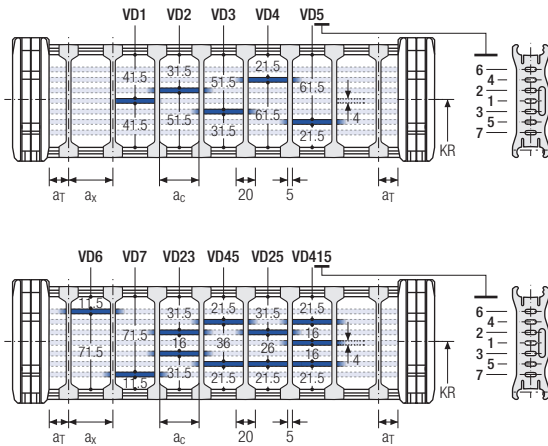

The dividers can be moved within the cross section (version A) or fixed (version B).

Divider system TS1 with continuous height separation

Vers.	a _T min [mm]	a _x min [mm]	a _c min [mm]	a _x Raster [mm]	Π _T min
A	10	20	15	—	2
B	12.5	20	15	5	2

The dividers can be moved within the cross section (version A) or fixed (version B).

TKHD90-R

Heavy-duty cable carrier with integrated roller

Pitch
90 mm

Inner height
87 mm

Inner widths
100 – 800 mm

Bending radii
250 – 500 mm

Stainless steel ball bearings with application-specific lubrication and plastic rollers ensure quiet and smooth

- suitable for all long travel applications
- lower drive power required
- quiet and low-vibration operation
- space-saving and cost-optimized
- long service life – low maintenance
- easy access to rollers
- minimized loads on cable carrier and cables

operation. Integrated, wear-free damping systems minimize the mechanical load for the entire system.

- low push and pull forces
- high travel speed and acceleration
- large additional loads possible
- using proved standard cable carriers
- retrofit of existing systems
- exchange other makes up to 100 %
- integration of existing guide channels

Stay variants

Aluminum stay RMF page 424
